# Prepare a report for our retail store for the year 2029

1- What is the month during which we achieved the highest revenue?

2- In which city did we record the highest number of orders?

3- When is the best time to run an advertising campaign to increase sales?

4- Which product sells the most?

## Requirement:

- Use Python and SQL for data cleaning.

- Use SQL Server

- Power BI for visualization

- Use GitHub for the project's presentation
